EDUCATION
- Computer System Engineering - Carleton University
- Full Stack Flex Web Development – Carleton University

SKILLS
- Good programming skills using **HTML**, **CSS** and **JavaScript**/**jQuery**
- Can request **JSON** files from **API's** using both **AJAX** requests and **fetch requests**
- Used **Visual Studio Code** to create webpages, examples can be seen in the project sections
- Comfortable using bootstrap and certain **JavaScript libraries**, such as **moment.js**
- Willingness to learn new concepts and a quick learner
- Hardworking and prefers being on time with work i.e., submitting before deliverables before or on the deadline
- Good verbal and written communication skills. Past reports have been written using the IEEE format
- Past experience using **C, C++** and **Java**. Participated in a group project where a digital clock was to be made using **C++** and **Java** to facilitate communication between 2 Raspberry Pis, an Arduino and an SQL database

Volunteer Experience/Extra-Curricular Activities:
- Office Volunteer, CUSA Food Centre, Carleton University   November 2019 - March 2020
  - Worked cooperatively with other volunteers to improve efficiency and to provide goods quicker
  - Assisted other volunteers when help was needed
